https://tekstovipesama.000webhostapp.com

Đorđe Rajčić, 21/14

# 1.Uvod

## 1.1 Korišćeni programski jezici

Prilikom izrade sajta korišćeni su sledeći programski jezici i okruženja: HTML, PHP, JavaScript, Ajax, JQuery i njegove biblioteke.

## 1.2 Opis funkcionalnosti

Sajt je omogućen za dodavanje tekstova pesama različitih žanrova. Tekstovi se iskljucivo dodaju ukoliko ste logovani na sajt sa svojim nalogom. Logovanje je realizovano sesijama. Kod registracije se koristi AJAX za proveru određenih parametara(korisnicko ime, email). Linkovi se učitavaju dinamički iz baze i moguća je potpuno kontrola linkova prikaza i sadržaja samih linkova iz admin panela. Takođe postoji i dinamička galerija čiji se sadržaj može potpuno kontrolisati. Pretraga se vrši nad tekstovima pesama koji se čuvaju u bazi, a koji se realizuje uz pomoć PHP-a. Prikaz više podataka na stranici realizovan je klasičnim straničenjem(tekstovi pesama, pretraga i galerija). Forme se proveravaju regularnim

izrazima pomoću JavaScripta i PHP-a. Potpuna administracija sajta uz pomoć admin panela.

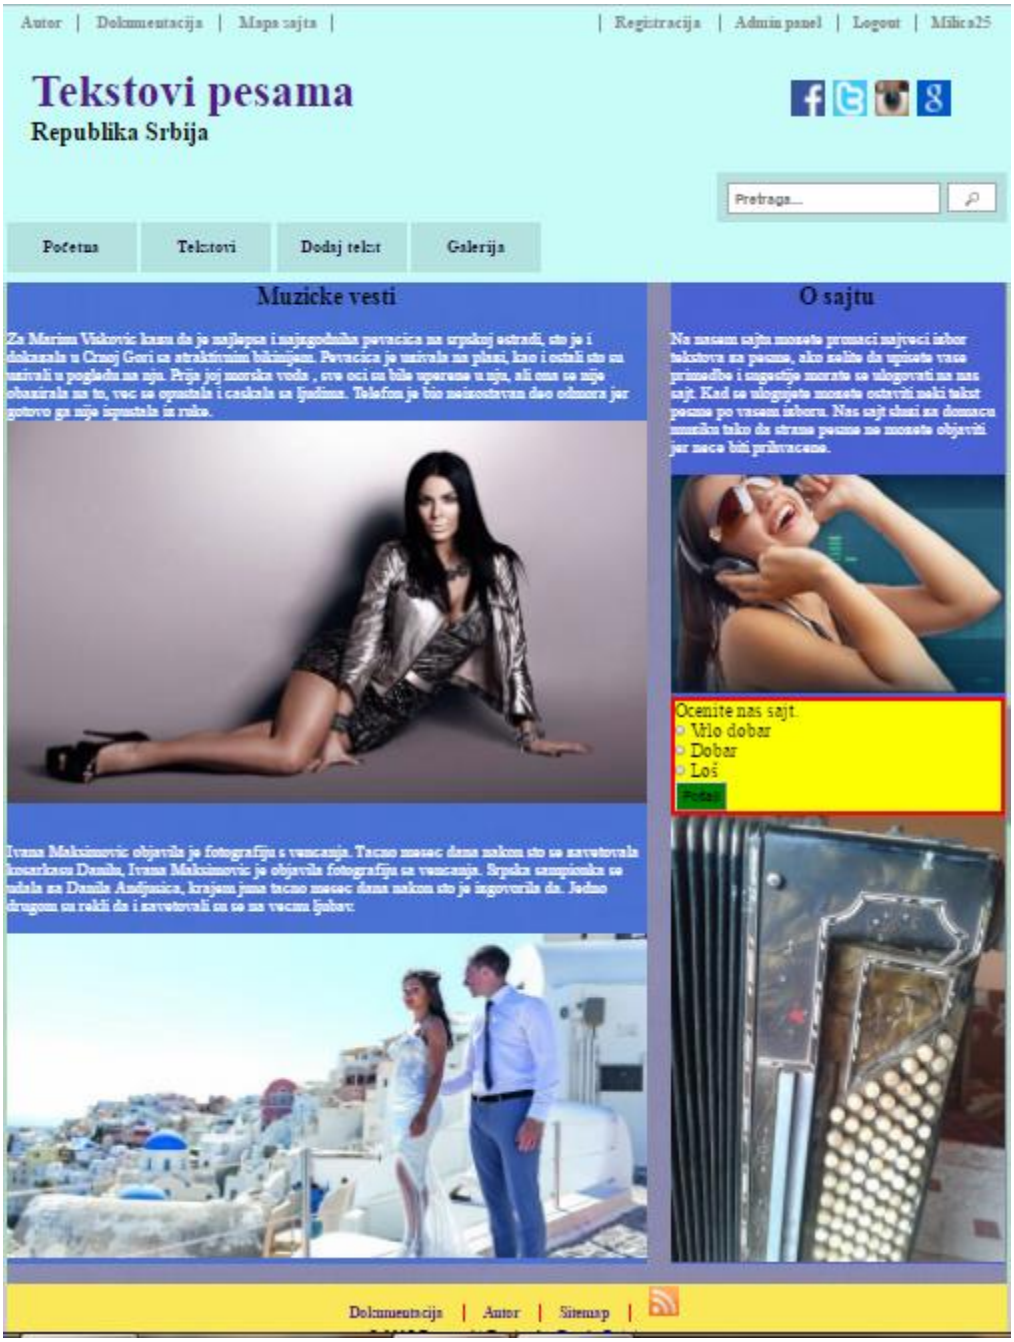
## 2.3 Slike stranica i funkcionalnosti

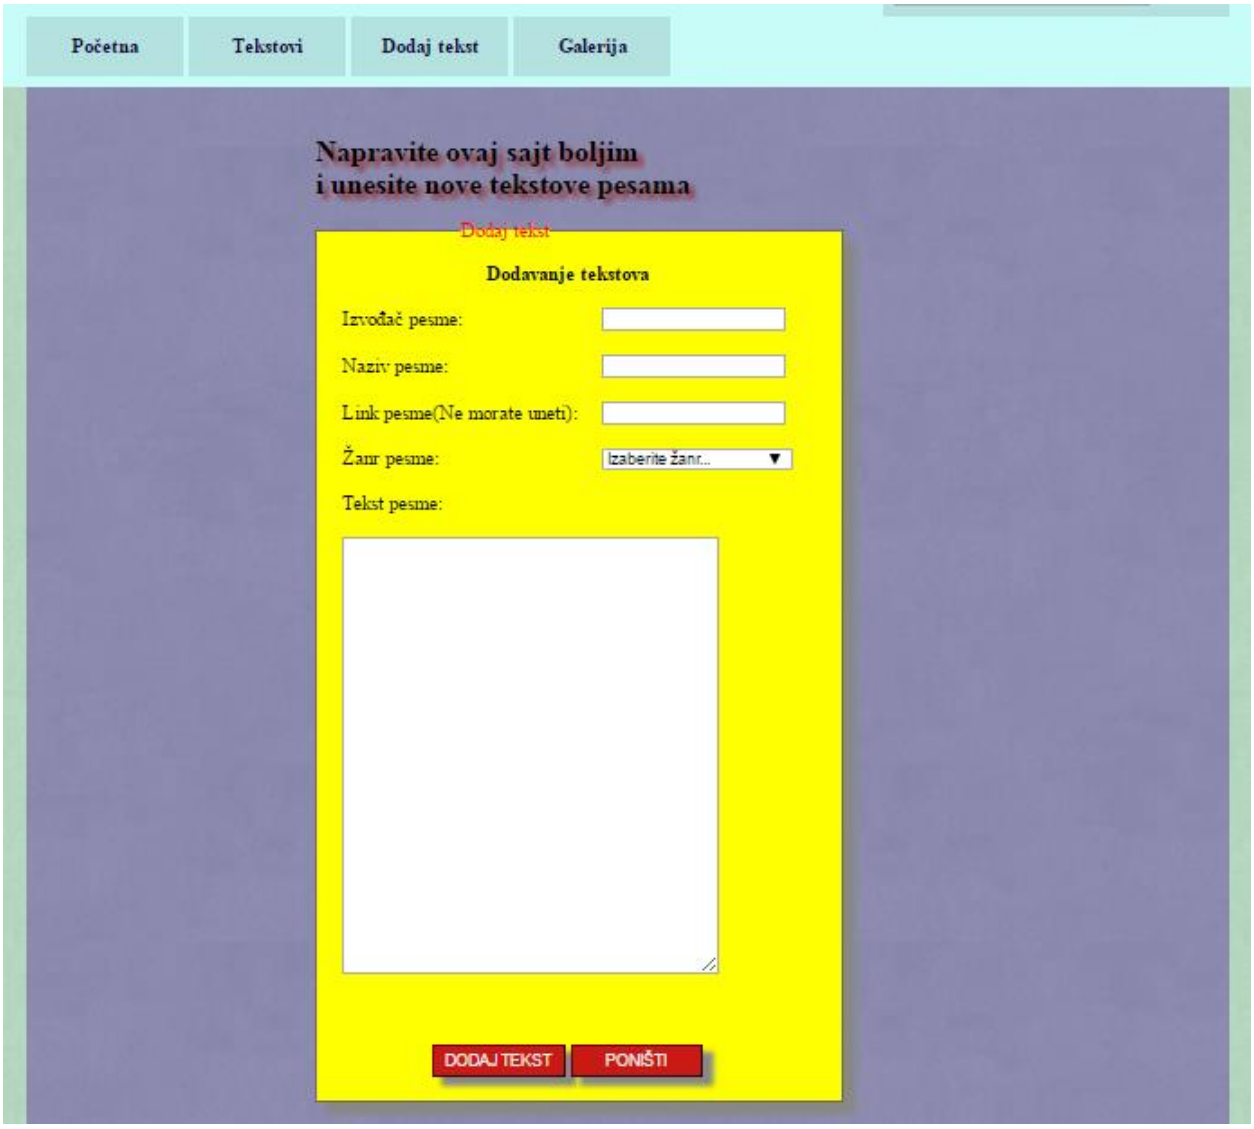


Sve je većinom statički sadrzaj.

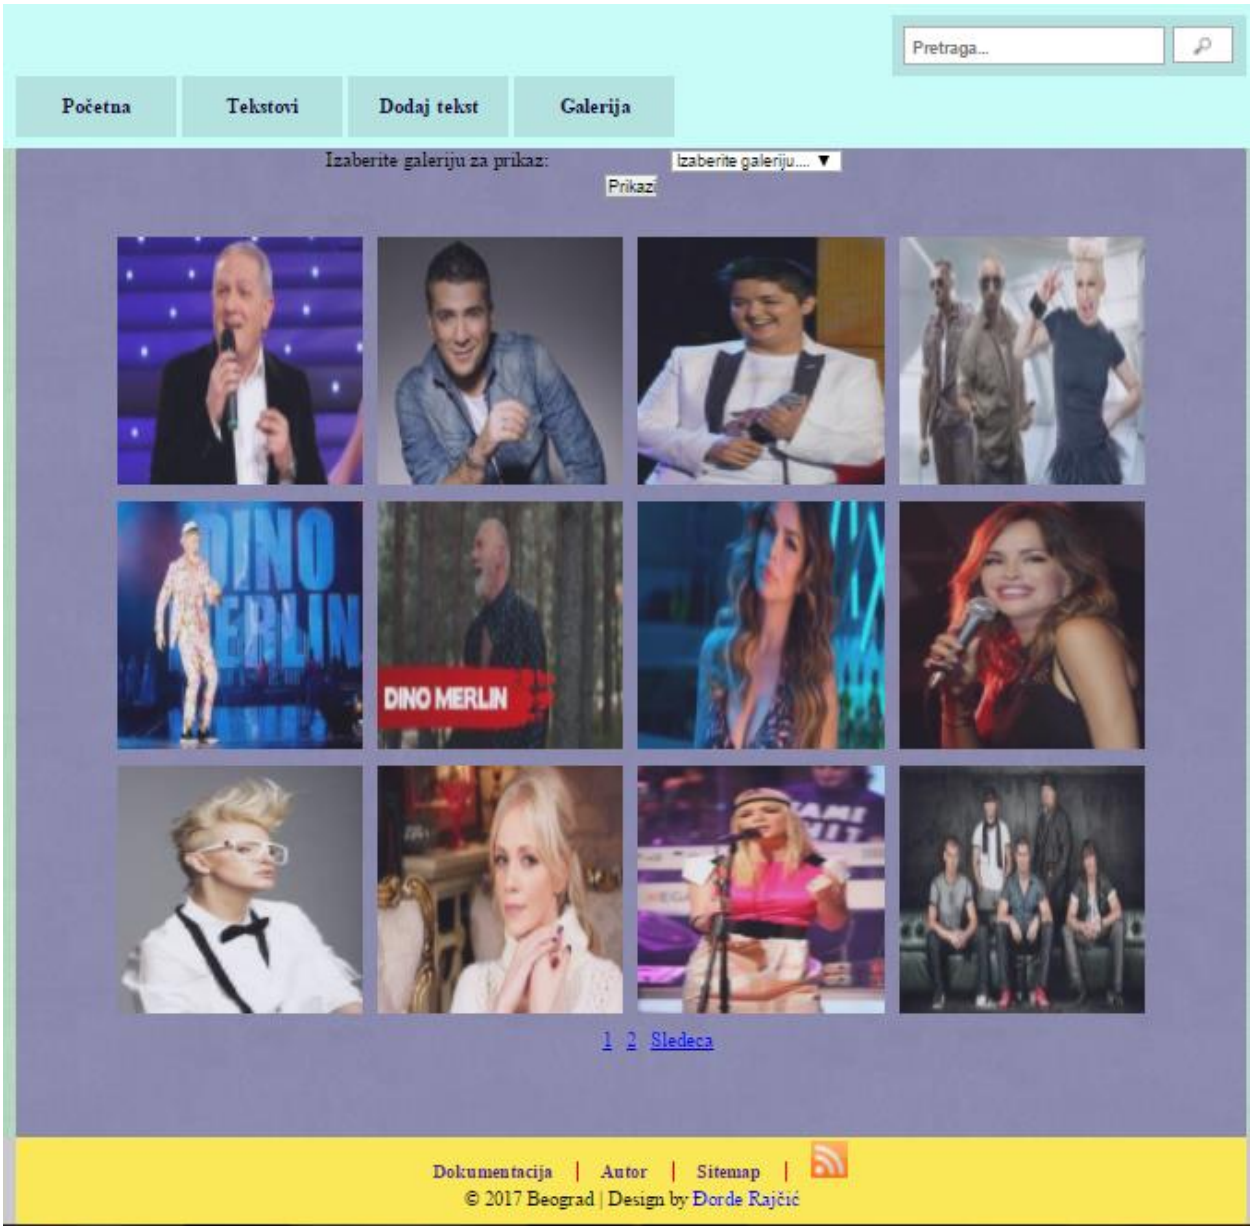
Strana o autoru.

Strana za registraciju korisnika. Sve provere sadrzaja forme se realizuju i na klijentu i na serveru. Uz pomoć Ajaxa se proverava da li su korisnicko ime i email koje korisnik unosi vec zauzeti. Nakon uspešnih provera podaci se upisuju u bazu. Korisnik je u obavezi da nakon toga ode na svoj email i potvdi registraciju. Tek nakon toga je moguć pristup sistemu.

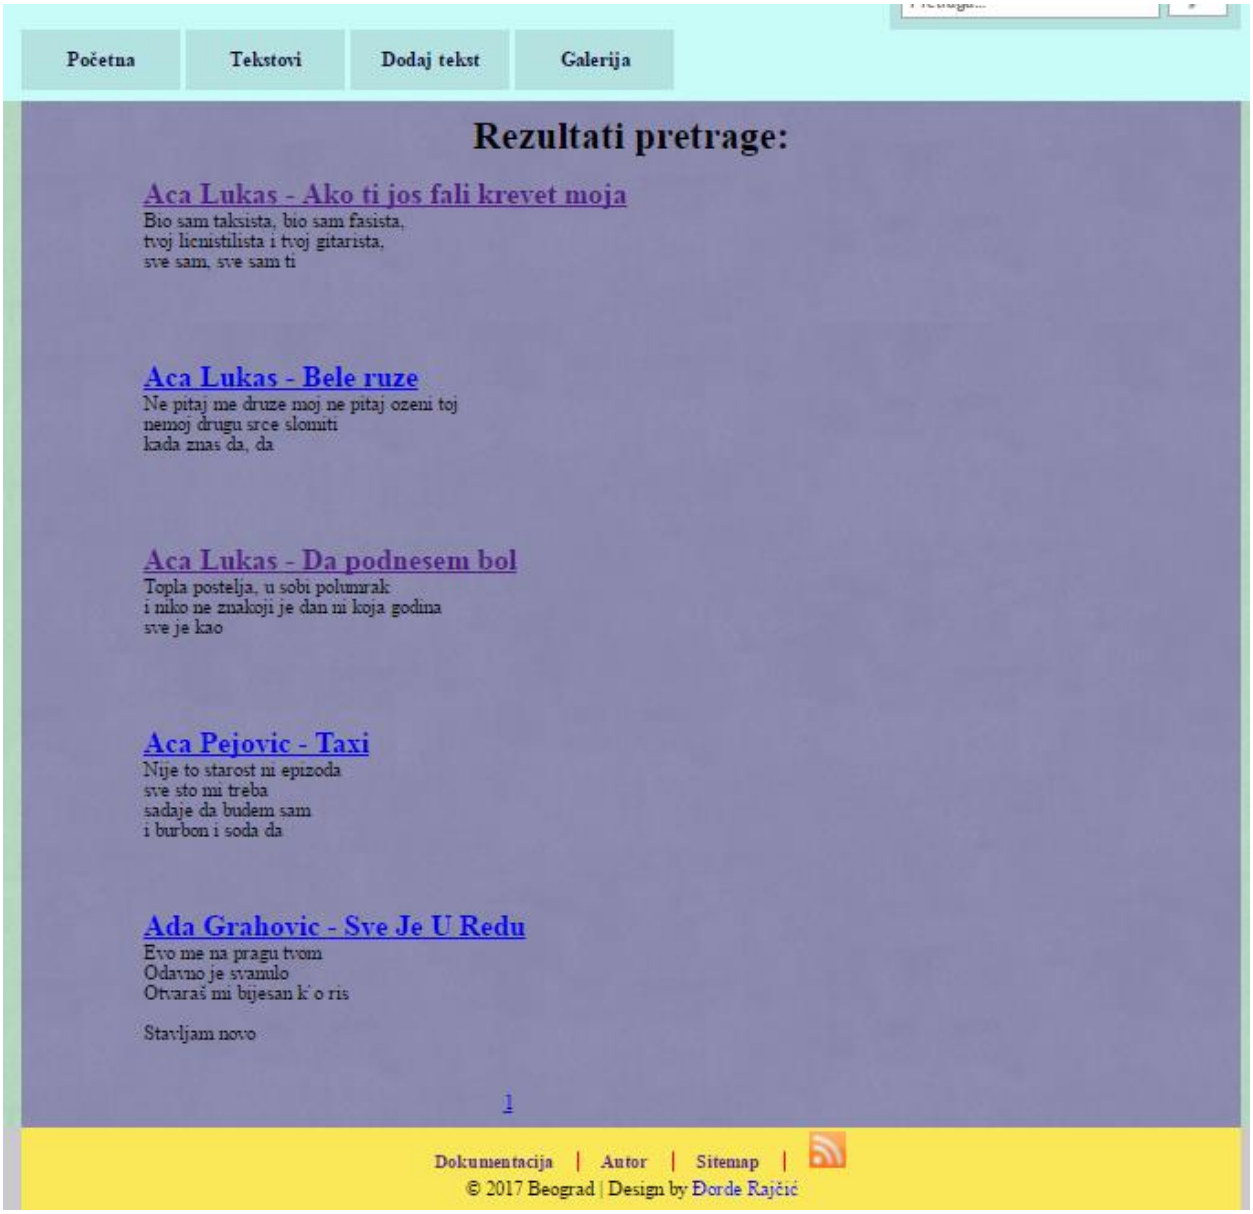
Strana za prijavu korisnika na sistem. Sve provere sadrzaja forme se realizuju i na klijentu i na serveru.Logovanje korisnika je realizovano uz pomoć sesija i zavisno od uloge koju korisnik ima razlikuju se mogućnosti pristupa određenim stranicama.



Stranica za unos tekstova pesama. Unos tekstova je dozvoljen samo korisnicima koji su prijavljeni na sistem. Sve provere sadrzaja forme se realizuju i na klijentu i na serveru. Sve padajuce liste na sajtu su dinamičke. Na svim formama je realizovan prikaz grešaka.



Galerija slika prikazuje slike muzičara iz različitih muzičkih žanrova. Unos i modifikacija slika je moguća iz admin panela. Korišćena je funkcija u php-u za skaliranje veličine slike. Galerija ima paginaciju.



Search strana pretrazuje uz pomoć php-a sve tekstove pesama koji se nalaze u bazi. Strana sadrži paginaciju. Moguć je i uvid u određenu muzičku numeru. Direktan pristup search strani nije moguć već isključivo putem search forme.

Stranice poput folk.php, pop.php, narodna.php shodno zanru prikazuju numere koje njima pripadaju. Pretraga se vrši komunikacijom sa bazom. Stranice sadrže straničenje. Izborom određene numere prikuje se tekst pesme i link ka istoj ukoliko je korisnik prilikom unosa teksta dodao i link ka youtube.

Powered by 000webhost

Admin panelu je moguće pristupiti samo ukoliko imate administratorske privilegije. Moguća je potpuna administracija dinamičkog sadržaja na sajtu(dodavanje, izmena, i brisanje).Moguća je izmena svake pojedinačne stavke za sve tabele koje postoje u bazi..Kod izmene ili brisanja slika i linkova briše se fajl na serveru. Takodje kod brisanja ili dodavanja linkova moguć je potpun uvid u sadržaj svih linkova.

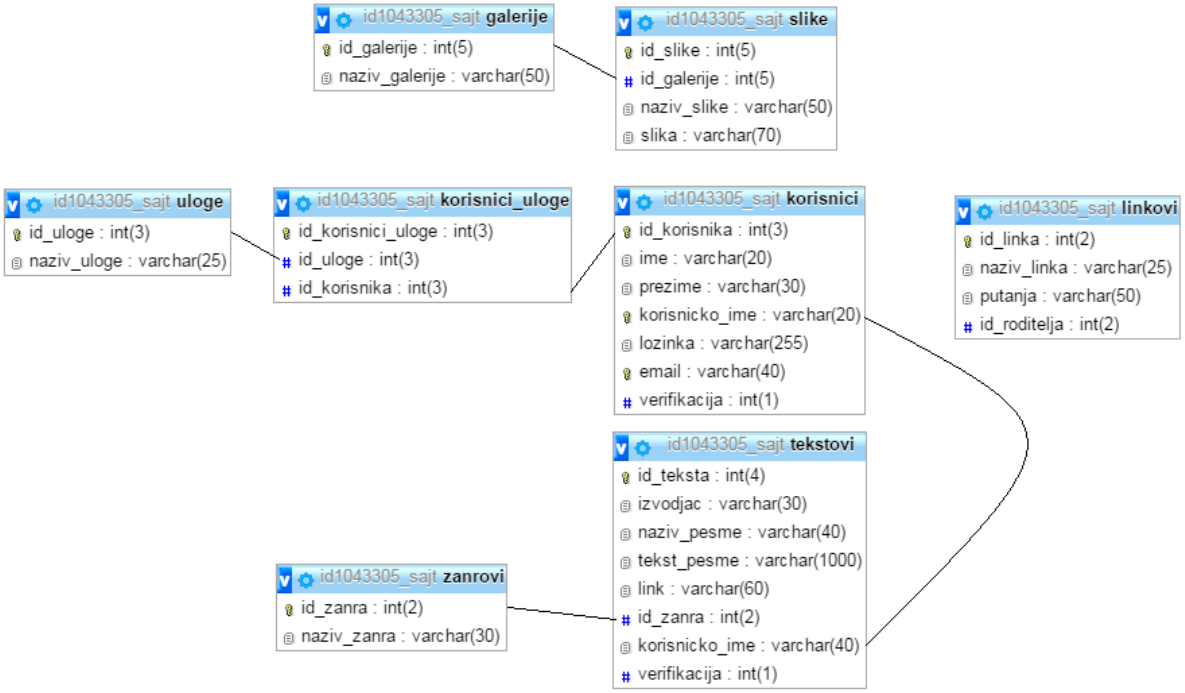
# 4.Dizajn baze



Nad svim tabela u bazi je primenjeno inner join spajanje. Postoje I dva trigera koja omogucavaju automatsko brisanje i dodavanje korisnickih uloga korisniku koji se prvi put prijavio na sajt tj. Onome koji je izbrisan.

```
CREATE TRIGGER `korisnici_nakon_brisanja` AFTER DELETE ON
`korisnici`

 FOR EACH ROW BEGIN

   DECLARE id int(3);

   SELECT ku.id_korisnika FROM korisnici k RIGHT JOIN korisnici_uloge ku
ON k.id_korisnika=ku.id_korisnika WHERE k.id_korisnika IS NULL ORDER
BY ku.id_korisnika DESC LIMIT 1 INTO id;
```

```
  DELETE FROM korisnici_uloge
  WHERE id_korisnika=id;

END

CREATE TRIGGER `korisnici_unos` AFTER INSERT ON `korisnici`
 FOR EACH ROW BEGIN

   DECLARE id int(3);

   SELECT id_korisnika FROM korisnici ORDER BY id_korisnika DESC LIMIT 1
INTO id;

   INSERT INTO korisnici_uloge
   ( id_uloge,
     id_korisnika)
   VALUES
   ( 1,
      id);

END
```
